## PROFILE SUMMARY

To work in an environment which encourages me to succeed and grow professionally where I can utilize my skills and knowledge appropriately. Demonstrate ability to manage and deliver projects efficiently.

## PROFESSIONAL EXPERIENCE

### Junior developer

Sep 2024 – present | Vijayapura, Karnataka

I'm currently working on an exciting MERN stack project for a banking application, leveraging React JS, Node JS, and MsSQL. The application focuses on creating a Unique Customer Identity Number (UCIN) for managing customer details efficiently.

- Key Technologies:

React JS: Developed a responsive and dynamic user interface using the React JS library, with additional styling powered by the Bootstrap CSS framework.

Node JS: Implemented backend functionality using Node JS to enable smooth communication between the client-side and server-side.

MsSQL: Utilized MsSQL for secure and reliable data storage, managing customer information through the creation of UCIN.

- My Role:

Developed a user-friendly interface using React JS and Bootstrap for a seamless customer experience.

Established backend connectivity with Node JS, ensuring smooth interactions between the front end and the database.

Integrated MsSQL to store and manage customer data securely.

This project has further enhanced my skills in full-stack development and working with the MERN stack in a real-world financial application context.

## COURSES

### FULL STACK DEVELOPER

Nov 2023 – Jul 2024 | Bangalore

@JSpider

- Demonstrating practical application of skills.
- Enhancing soft skills such as teamwork and communication.
- Leveraged full stack proficiency in Java Programming language, JavaScript Scripting language and Structured Query Language (SQL).

## EDUCATION

**B.E** Jul 2019 – May 2023 | Vijayapura, India  
B. L. D. E. A's Engineering College. 7.06 CGPA

**Intermediate** Jun 2018 – Mar 2019 | Vijayapura, India  
P.D.J PU College. 61.50%

**SSLC** Jun 2016 – Apr 2017 | Vijayapura, India  
Sri Saraswathi Primary and High School. 66.08%

## PROJECTS

### Movie Management Application with Full CRUD Functionality and storing in json Database

May 2024 – May 2024

Tools: React.js

- Developed a movie management application using React.js, enabling users to add, display, update, and delete movie details. Utilized HTML, CSS, and JavaScript for frontend design and functionality, showcasing full CRUD operations.

### Web-Based Bus Ticket Booking Application – (Spring-Boot)

Jun 2024 – Jul 2024

Spring-Boot (backend) | Thymeleaf (templating) | Cloudinary (image storage) | Razorpay (payment gateway)

- I have developed a comprehensive bus ticket booking application using Spring Boot and Thymeleaf, comprising two distinct modules for agencies and customers.

- The agency module enables account creation through OTP-verified email confirmation and facilitates bus management with features like uploading bus images securely to Cloudinary, adding routes with station-specific pricing and timings, and managing these entries through editing and deletion functionalities.
- On the customer side, users can search for buses based on origin, destination, and date, with dynamic filtering based on selected weekdays.
- They can sign up, log in, and manage their accounts, book seats securely through Razorpay integration, and view their booking history.
- Technical implementation includes robust security measures like OTP verification, session management for role-based access control, and seamless integration of external services such as Cloudinary for image storage and Razorpay for payments.
- This project has significantly enhanced my proficiency in backend development, API integration, and security practices for web applications.

## SKILLS

---

### Languages

- Java Programming language
- JavaScript Scripting language
- Oracle SQL - Structured Query Language

### Web Development

- Essential tools for building responsive and interactive web applications.
  - HTML5 | CSS | React JS

### Application Programming Interface - ( API )

- Used for connecting and managing data between applications and databases.
  - JDBC java API | Servlet | Restful API

### Framework

- Hibernate - Streamlined database management in the Customer Details Storage System.
- SpringBoot (Spring IOC, Spring MVC) - Facilitated the development of the Web-Based Bus Ticket Booking Application.
- Bootstrap and Tailwind css framework.

### Tools and Technology

- Integrated development environments and tools for efficient coding, testing, and database management.
  - Eclipse | Visual Studio Code | Oracle-SQL | MySQL | Postman | MsSQL

## CODING CHALLENGES AND COMPETITIONS

---

### Leetcode: Profile

- Actively solving coding challenges to improve problem-solving skills and coding efficiency. Focused on mastering algorithms and data structures.

### HackerRank: Profile

- Gaining practical experience in SQL and enhancing coding skills. Achieved a 3-star rating, showcasing proficiency in solving real-world data challenges.

## PERSONAL SKILLS

---

- Having Leadership Qualities
- Ability to work under pressure
- Comfortable Working Independently
- Ability to take initiative to solve problem

## ACTIVITY

---

- Helping local school to archive good results enhance their enrolment in higher / technical / vocational education.
- Tourism promotion innovative approach.
- Reduction of energy consumption.
